

AFRICA'S INTEGRATED IDENTITY PLATFORM

One identity foundation - defending against fraud and powering growth across every channel your customers touch.

**Five vendors.
One customer.
Zero visibility.**

If you're like most enterprises, your identity stack is a patchwork. One supplier checks documents, another runs biometrics, a third screens for sanctions, a fourth authenticates returning customers.

Each is its own integration, its own contract and its own blind spot, and fraud lives in the gaps between them.

ONE platform.
integration.

Contactable sits underneath the patchwork. Connect once, and every check, data source and workflow in your identity journey runs through a single layer you can see and control — across every channel.

Athena, our AI engine, runs the journey: 80+ pre-built integrations, over 90% of decisions automated, every one auditable. Less to manage, more to trust — and identity that stops being a checkpoint and starts driving growth.

Customer Verification

Document, biometric, address & account checks.

Company Verification

KYB & ultimate beneficial ownership with Dominion UBO.

Reusable Identity

Verify once, reuse across the group. Cuts repeat KYC cost & onboarding drop-off.

Fraud & Risk Intelligence

Real-time scoring & pattern detection across the journey.

Compliance & Screening

AML & sanctions checks built into the workflow, not bolted on.

Trusted in high-volume, high-compliance environments
